

We are delighted that you have chosen this product. Our high-quality product has been tried and tested for racing and specially developed for sporting challenges. Correct installation of the product is essential for guaranteeing the maximum level of safety and functionality. Please follow the fitting instructions or contact an authorized dealer. The (quasi-)manufacturer or supplier cannot be held accountable for incorrect installation or usage of this product.

**KTM AG is represented in the countries by:**

- KTM Sportmotorcycle GmbH, Stallhofnerstrasse 3, 5230 Mattighofen, Austria
- Husqvarna Motorcycles GmbH, Stallhofnerstrasse 3, 5230 Mattighofen, Austria
- GASGAS Motorcycles GmbH, Stallhofnerstrasse 3, 5230 Mattighofen, Austria

The fitting instructions contain the latest information for this model series at the time of going to print. However, minor differences due to further developments in design cannot be ruled out completely.

All specifications contained herein are non-binding. KTM AG specifically reserves the right to modify or delete technical specifications, prices, colors, forms, materials, services, designs, equipment, etc., without prior notice and without specifying reasons, to adapt these to local conditions, as well as to stop production of a particular model without prior notice. KTM AG accepts no liability for delivery options, deviations from figures and descriptions, misprints, and other errors. The models portrayed partly contain special equipment that does not belong to the regular scope of supply.

# 1 MEANS OF REPRESENTATION

## 1.1 Symbols used

The meaning of specific symbols is described below.

Indicates an expected reaction (e.g., of a work step or a function).

Indicates an unexpected reaction (e.g., of a work step or a function).

All work marked with this symbol requires specialist knowledge and technical understanding. In the interest of your own safety, have these jobs performed by an authorized workshop! Your motorcycle will be optimally cared for there by specially trained experts using the special tools required.

Indicates a page reference (more information is provided on the specified page).

Indicates information with more details or tips.

Indicates the result of a testing step.

Indicates a voltage measurement.

Indicates a current measurement.

Indicates the end of an activity, including potential reworking.

## 1.2 Formats used

The typographical formats used in this document are explained below.

**Proprietary name**

Indicates a proprietary name.

**Name®**

Indicates a protected name.

**Brand™**

Indicates a brand available on the open market.

**Underlined terms**

Refer to technical details of the vehicle or indicate technical terms, which are explained in the glossary.

## 2.1 Use definition – intended use

It is imperative that an authorized dealer provide expert consultation on technical accessories and install them properly using a special tool to ensure optimum safety and functioning. Homologation documents are available for articles with markings (EC, ECE etc). The customer must check, if necessary with the national approving authorities, if these homologation documents ensure total homologation of the respective vehicle with installed technical accessories in the planned country of usage. If you have any further questions, contact your authorized dealer.

### Info

EU markings: EC (EC type approval), ECE (ECE type approval), ABE (national type approval (NTA)), EC-V (EC type approval for motor vehicles), FIM (FIM noise conformity), CCCUO\_EU (not permitted for use on public roads) and HONN (homologation not necessary)

USA markings: 50-State (50 states law), USFS (US Forest Service), FIM (FIM noise conformity), AMA (amateur noise conformity), DOT (Department of Transportation) and CCCUO (not permitted for use on public roads)

## 2.2 Misuse

The vehicle must only be used as intended.

Dangers can arise for people, property and the environment through use not as intended.

Any use of the vehicle beyond the intended and defined use constitutes misuse.

Misuse also includes the use of operating and auxiliary fluids which do not meet the required specification for the respective use.

## 2.3 Safety advice

A number of safety instructions need to be followed to operate the product described safely. Therefore read this instruction and all further instructions included carefully. The safety instructions are highlighted in the text and are referred to at the relevant passages.

### Info

Various information and warning labels are attached in prominent locations on the product described. Do not remove any information or warning labels. If they are missing, you or others may not recognize dangers and may therefore be injured.

## 2.4 Degrees of risk and symbols

### Danger

Identifies a danger that will immediately and invariably lead to fatal or serious permanent injury if the appropriate measures are not taken.

### Warning

Identifies a danger that is likely to lead to fatal or serious injury if the appropriate measures are not taken.

### Note

Indicates a danger that will lead to environmental damage if the appropriate measures are not taken.

## 2.5 Safe operation

### Danger

**Danger of accidents** A rider who is not fit to ride poses a danger to him or herself and others.

- Do not operate the vehicle if you are not fit to ride due to alcohol, drugs or medication.
- Do not operate the vehicle if you are physically or mentally impaired.

### Danger

**Danger of poisoning** Exhaust gases are toxic and inhaling them may result in unconsciousness and death.

- Always make sure there is sufficient ventilation when running the engine.
- Use effective exhaust extraction when starting or running the engine in an enclosed space.

### Warning

**Danger of burns** Some vehicle components become very hot when the vehicle is operated.

- Do not touch any parts such as the exhaust system, radiator, engine, shock absorber, or brake system before the vehicle parts have cooled down.
- Let the vehicle parts cool down before you perform any work on the vehicle.

Only operate the vehicle when it is in perfect technical condition, in accordance with its intended use, and in a safe and environmentally compatible manner.

The vehicle should only be used by trained persons. An appropriate driver's license is needed to drive the vehicle on public roads.

Have any faults that impair safety immediately remedied by an authorized workshop.

Adhere to the information and warning labels on the vehicle.

## 2.6 Protective clothing

### Warning

**Risk of injury** Missing or poor protective clothing presents an increased safety risk.

- Wear appropriate protective clothing such as helmet, boots, gloves as well as trousers and a jacket with protectors on all rides.
- Always wear protective clothing that is in good condition and meets the legal regulations.

In the interest of your own safety, KTM AG recommends that you only operate the vehicle while wearing suitable protective clothing.

## 2.7 Work rules

Unless specified otherwise, the ignition must be turned off during all work (models with ignition lock, models with remote key) or the engine must be at a standstill (models without ignition lock or remote key).

Special tools are necessary for certain tasks. The tools are not a component of the vehicle, but can be ordered using the number in parentheses. Example: bearing puller (15112017000)

Unless otherwise noted, normal conditions apply to all tasks and descriptions.

Ambient temperature	20 °C (68 °F)
Ambient air pressure	1,013 mbar (14.69 psi)
Relative air humidity	60 ± 5 %

During assembly, use new parts to replace parts which cannot be reused (e.g. self-locking screws and nuts, expansion screws, seals, sealing rings, O-rings, pins, and lock washers).

In the case of certain screws, a screw adhesive (e.g. **Loctite**®) is required. Observe the manufacturer's instructions.

If thread locker (e.g., **Precote**®) has already been applied to a new part, do not apply any additional thread locker.

After disassembly, clean the parts that are to be reused and check them for damage and wear. Change damaged or worn parts.

After completing a repair or service work, check the operating safety of the vehicle.

## 2.8 Environment

If you use your motorcycle responsibly, you can ensure that problems and conflicts do not occur. To protect the future of the motorcycle sport, make sure that you use your motorcycle legally, be environmentally aware, and respect the rights of others.

When disposing of used oil, other operating and auxiliary fluids, and used components, comply with the laws and regulations of the respective country.

Because motorcycles are not subject to the EU regulations governing the disposal of used vehicles, there are no legal regulations that pertain to the disposal of an end-of-life motorcycle. Your authorized dealer will be glad to assist you.

## 2.9 Fitting instructions

It is important that you read these fitting instructions carefully and completely before making your first trip. The fitting instructions contain useful information and many tips on how to operate, handle, and service your motorcycle. Only then will you find out how to customize the vehicle ideally for your own use and how you can protect yourself from injury.

Keep the fitting instructions in an accessible place to enable you to refer to it as needed.

If you would like to know more about the vehicle or have questions about the material, please contact an authorized dealer.

The fitting instructions are an important component of the accessories and must be handed over to the new owner if the vehicle is sold.

## 3.1 Fuel, auxiliary substances

### Note

**Environmental hazard** Improper handling of fuel is a danger to the environment.

- Do not allow fuel to enter the groundwater, the soil, or the sewage system.

Use fuels and auxiliary substances in accordance with the Owner's Manual and specification.

## 3.2 Spare parts, accessories

For your own safety, only use spare parts and accessory products that are approved and/or recommended by KTM AG and have them installed by an authorized workshop. KTM AG accepts no liability for other products and any resulting damage or loss.

Certain spare parts and accessory products are specified in parentheses in the descriptions. Your authorized dealer will be glad to advise you.

The current **KTM PowerParts** for your vehicle can be found on the KTM website.

International KTM Website: [KTM.COM](http://KTM.COM)

The current **Husqvarna Motorcycles accessories** for your vehicle can be found on the Husqvarna Motorcycles website.

International Husqvarna Motorcycles website: [www.husqvarna-motorcycles.com](http://www.husqvarna-motorcycles.com)

The current **GASGAS Motorcycles accessories** for your vehicle can be found on the GASGAS Motorcycles website.

International GASGAS Motorcycles website: <http://www.gasgas.com>

## 3.3 Figures

The figures contained in the manual may depict special equipment.

In the interest of clarity, some components may be shown disassembled or may not be shown at all. It is not always necessary to disassemble the component to perform the activity in question. Please follow the instructions in the text.

## 3.4 Customer service

Your authorized dealer will be happy to answer any questions you may have regarding your vehicle and about KTM, Husqvarna Motorcycles or GASGAS Motorcycles.

A list of authorized KTM dealers can be found on the KTM website.

International KTM Website: [KTM.COM](http://KTM.COM)

A list of authorized Husqvarna Motorcycles dealers can be found on the Husqvarna Motorcycles website.

International Husqvarna Motorcycles website: [www.husqvarna-motorcycles.com](http://www.husqvarna-motorcycles.com)

A list of authorized GASGAS Motorcycles dealers can be found on the GASGAS Motorcycles website.

International GASGAS Motorcycles website: <http://www.gasgas.com>

## 4.1 Scope of supply

- 1x Connectivity Unit ①
- 1x Rubber support ②

ENGLISH

## 5.1 Assembly

### Preliminary work

- Remove windshield plate (see Owner's Manual).

### Assembly

- Remove screws **3**.
- Hold the headlight.
- Remove screw **4**.
- Take off the headlight towards the front and hang it carefully to the side.
- Slip out connector **5** and remove the dummy connector.
- Slip out connector **6** and remove the dummy connector.
- If not preassembled, mount rubber support **2** on control unit **1** (both included).
- Mount control unit **1** in holder as shown.
- Join plug-in connector **7**.
- Join plug-in connector **8**.
- Route all cables without tension and secure with cable ties, if necessary.

- Position the headlight.
- Mount and tighten screw 4.

Guideline

Screw, headlight adapter on headlight	M6	10 Nm (7.4 lbf ft)
---------------------------------------	----	--------------------

- Mount and tighten screws 3.

Guideline

Screw, headlight	M6x18	10 Nm (7.4 lbf ft)
------------------	-------	--------------------

**Info**

The Connectivity Unit function must be activated with the diagnostics tool after assembly and flashed with the latest software.

This must be performed in an authorized workshop. The Connectivity Unit is operated via the combination instrument and must be enabled in the menu.

**Final steps**

- Install windshield (see Owner's Manual).
- Check headlight setting (see Owner's Manual).
